

Model "9"—With Dependable Gearless Transmission, Electric Starting, Lights and Full Equipment, \$1250

The Asset of Gearless Transmission

Model "9" is this season's offering in the gearless transmission Cartercars.

Because of the simple principle involved and the practical application of it in the gearless transmission, all Cartercars have been famous for their strength and simplicity.

Thus the Cartercars have been popular with men and women who have desired all sufficient power under any road conditions. With those who, too, would avoid the

usual intricate machinery that can be kept in order only by skilled mechanics.

With a Cartercar, your wife or daughter can drive in the city or over country roads with ease and safety. Hundreds of speeds—but no clutch to bother and no gears to get noisy.

The advantages of the infinite number of speeds are many fold.

With the Cartercar you are always provided with a gear ratio which fits the requirements of the occasion.
